

Product BULLETIN

VPI ESD Tile Now Contributes To Qualification for Two (2) LEED Credits

Effective April 1, 2008 VPI is pleased to announce that, due to product innovation improvements, VPI ESD tile contributes to qualification for two (2) LEED credits:

LEED Credits 4.1 and 4.2 (Recycled Materials Content).

VPI conductive adhesives also contribute to qualification for one (1) LEED credit:

LEED Credit IEQ 4.1 Low Emitting Adhesives & Sealants (Zero VOC's)

Like all VPI Products, VPI Static Control Tile is also certified to contain:

Zero Heavy Metals & Zero Lead

VPI ESD tile also provides the industry with one of the most sustainable products on the market. While many environmental groups agree recycled content is beneficial:

Sustainability is critical to reducing carbon foot printing

VPI ESD tile products are manufactured in the USA, compared to imported products:

VPI ESD Tile Offers a Much More "Earth-Friendly" Carbon Footprint

Additionally VPI ESD tiles, at ambient temperature & pressure have:

Zero Out-Gassing

For over 60 years VPI has provided innovation & leadership in the resilient flooring industry & today VPI continues to play a leading role in creating unique Earth-Friendly resilient flooring solutions.
