

Product BULLETIN

October 27, 2008

Dear Valued Customer,

Please find enclosed a copy of **the new VPI Wall Base and Installation Architectural Folder**. The wall base folder completes the architectural folder re-design of our three major product groups, Rubber Products, Static Control Tile and Wall Base.

The enclosed wall base folder is full of new information and now includes VPI's full line of color integrated "Super Match" installation accessories as well as VPI's 70 standard wall base colors.

This latest addition should allow your A&D representatives to bring increased value to the architectural community. VPI's focus on "earth-friendly" wall base and installation accessories should also grab the attention of the increasing number of architects who are actively seeking LEED & Floor Score certified, environmentally - friendly products to specify.

Like the new VPI Rubber & Static Control Tile folders previously introduced the new VPI Wall Base and Installation Architectural Folder can also double as a wall board that are very popular with some contractors as well as many architectural firms.

Please enjoy your complimentary copy of our new VPI Wall Base and Installation Architectural Folder and of course feel free to order additional folders by faxing your orders to 920-458-1368. The part number for the new VPI Wall Base Folder is 11MK3005 and there are 18 catalogs per carton. Each folder is priced at \$20.00.

Because of our new and improved Wall Base Folders we are discontinuing our Wall Base Boards (11MK2028). We are also discontinuing our Adhesive Tapes – both the Medium (AS-M) and the Large (AS-L) tapes due to lack of sales demand.

Thank you for your continuing and outstanding support of VPI.

Sincerely,

A handwritten signature in blue ink that reads 'Thomas H. Reese'.

Thomas H. Reese
Vice President – Sales
