

Product BULLETIN

****IMPORTANT ANNOUNCEMENT**** **PRODUCT UPDATE**

January 10, 2025

Dear Valued Distributor Partner,

We are happy to announce our new #155 ESD Epoxy Adhesive (01551G) to replace our #150 ESD Epoxy Adhesive (01501G). We have discontinued our #150 ESD Epoxy Adhesive.

This new epoxy is also engineered for use below, on or above grade and with heavy load traffic such as hospital beds, as was the #150 adhesive. Depending on conditions and application, spread rate is nominally 225 square feet per gallon which differs from our other adhesives. In addition, this new epoxy uses a different trowel than our other adhesives. Please see the adhesives section of our website for more details including substrate requirements, trowel size and open times.

If you have any existing stock of VPI #150, it remains a high performing solution to use with our floors and should continue to be used. We kindly ask that future orders for VPI #150 adhesive change to VPI #155.

Along with our #150 Epoxy Adhesive, we are discontinuing our #06501G PRT Flex Stripper.

With this communication, please also find our updated price list showing the changes to VPI #155 and a price decrease on our #165 ESD Acrylic Adhesive (01651G & 01654G) when purchased separately. These changes are effective immediately. Our website and other supporting documentation have been updated and can be accessed at www.vpicorp.com.

Please share this product update with your teams and customers.

Sincerely,

A handwritten signature in black ink that reads 'Tom Bourne'.
